

Cordless TrackMan® Wheel

**Cordless freedom, comfort
and performance**

Logitech® Cordless Trackman® Wheel gives you new freedom to work the way you want to. You're free to place this trackball where it's most comfortable for you to use, without having to struggle with a cord. Enjoy advanced performance without regular cleaning, thanks to Logitech's patented optical technology. Use the scroll wheel for easy scrolling, and to easily navigate the Web with the innovative WebWheel™ feature. It all adds up to an exceptional trackball experience.

Experience true freedom

Logitech's advanced radio digital technology frees you from the limitations of a cord, allowing you to use Cordless Trackman Wheel in a six-foot range around your computer. It works without needing to be pointed at your computer. You'll even get great performance on crowded desks where cups, piles of paper, and books come between the trackball and the computer.

Enjoy enhanced performance with less maintenance

For over 5 years Logitech has been designing optical technology into our award winning

trackballs. The patented optical technology delivers advanced performance by replacing the mechanical parts of traditional trackballs with an optical tracking system. As a result, you'll enjoy superior precision, and smooth motion, even if the ball gets dirty or scratched. And Cordless Trackman Wheel frees you from the chore of having to regularly clean the trackball.

Made for comfort

Cordless Trackman Wheel provides gentle curves that put the buttons and scroll wheel under your fingers. The trackball falls under your thumb for fast, precise cursor control.

Quickly scroll and zoom

Use the scroll wheel for fast, easy scrolling in your applications. Just move the wheel to scroll, without having to click in scrollbars.

Easily navigate the web

Just press the scroll wheel and Logitech's WebWheel feature puts browsing commands and web sites at your fingertips. Roll the wheel to move back, go to the next page, select another command or go directly to your

Cordless TrackMan® Wheel

Cordless freedom, comfort and performance

favorite sites. WebWheel comes with five pre-set sites and makes it simple to customize these sites and update your choices any time.

Save time with one-click shortcuts

Logitech® MouseWare® software already assigns double clicking with a single click and other step-saving shortcuts to the buttons. A pull-down menu of available shortcuts makes it simple to change the settings to the commands you use most of ten.

Smart power management

Logitech's unique smart power management features help one standard AA battery, including the one we've included in the package, to power this mouse for months of normal use. A low-battery indicator gives you plenty of warning when you need fresh batteries.

Very easy to install

The compact receiver lets your trackball "talk" to the computer. Just plug the receiver into your system, then hide it behind your computer, or set it off your desk, and forget about it.

Experience Logitech quality

This trackball is made with the uncompromising quality of Logitech, the leading maker of cordless and corded mice and trackballs .

Warranty

The Logitech® Cordless Marble® Wheel includes a five-year limited warranty.
